Final report
EDH7916

Benjamin Skinner

From the syllabus:

> *For your final project, you must produce a 3-5 page report on a higher education topic of interest. The report should be a combination of writing, tables, and figures, have minimal citations (if any), and be fully reproducible with minimal effort. You must use data that is either publicly available or that can be shared with others (no IRB restrictions). Everyone will submit three preliminary assignments in addition to the final report.*

This assignment represents the final report.

For your final report, I need:

1. A clearly formatted RMarkdown (`.Rmd`) file that will build your report
2. Either:
   - A copy of your data
   - *Very clear* instructions on how to get your data

Your report will be graded according to the final report rubric.

Submission details

- Save your file as: `<name>_final_report.Rmd` (if submitting an Rmd file) where your last name replaces `<name>` (*e.g.* `skinner_final_report.Rmd`) in your `final_project` folder.
- Push to your GitHub repo prior to the start of the class in which it is due. If you are unsure whether you have successfully pushed your changes, check the online version of your repo at GitHub.com. If you can see your changes there, I can see them too.
